Activity Directions

For this activity, you will act as a data analyst looking at a new dataset. Your task is to carefully observe the "Sample Customer Order Data" spreadsheet below. As you examine the data, pay close attention to the kind of information contained in each column and look for any inconsistencies or missing values.

After you have reviewed the data, answer the multiple-choice questions that follow to test your understanding of different data types and common data quality issues.

Sample Customer Order Data

Order ID	Product Name	Quantity	Order Date	Customer Rating
1001	Wireless Earbuds	2	2025-07-01	5
1002	Smart Watch	1	2025-07-05	4
1003	Portable Speaker	3	2025-06-28	Excellent
1004	USB-C Cable (2-pack)	5	2025-07-10	3
1005	External Hard Drive	1	2025-07-12	
1006	Gaming Mouse	1	2025-07-15	2

1.   What type of data is primarily represented in the "Quantity" column?   **1 point**

   ⚪ Text data

   🔘 Numerical data
